TOOLS SUGGESTED

Set of hex wrenches and a set of combination wrenches.

STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition.

CAUTION! Larger footpegs may limit cornering clearance.

STEP 2 Remove the stock rear foot pegs and set aside all mounting hardware (make note in the order of ball detent and washer(s) location). They will be reused with new application.

STEP 3 Mount new peg adapter using the stock hardware removed in step 2.

STEP 4 Check to see if the new adapter locks in the upward position and releases easily. If it is not locking, disassemble and check to see if ball detent is pushed out of the adapter far enough to grab the locking washer. Reassemble after inspection.

STEP 5 Tighten all fasteners and repeat on opposite side.

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.
